Item No. 30 – FOUNDATION INJECTION

<u>PAY ITEM</u>	<u>PRICE PER UNIT</u>
Foundation Injection	\$ _____/Structure #6976
Foundation Injection	\$ _____/Structure #6982
Foundation Injection	\$ _____/Structure #6961
Foundation Injection	\$ _____/Poseyville over the Jo Drain

DESCRIPTION

Attached are pictures/reports of 4 structures to be stabilized thru Mud Injection or Hydro Insensitive Polyurethane Injection. The MCRC will first stabilize the footing by excavating in front of the footing 30” deep, installing a concrete filled fabric, and placing riprap for stabilization. The contractor will be required to drill injection holes thru the footing and if necessary the abutment wall. Through pressure injection the product will be injected one hole at a time until the entire void is confirmed filled. This process is to be repeated on both sides of the structure.

Work to be performed in mid-summer when the drain has little to no flow. The road commission will provide traffic control one structure at a time.

Brooks Road over the Jo Drain - Structure #6976
Schreiber Road over the Jo Drain - Structure #6982
Smiths Crossing Road over the Jo Drain - Structure #6961
Poseyville Road over the Jo Drain
